Create a resource group

BasicsTagsReview + create

Resource group - A container that holds related resources for an Azure solution. The resource group can include all the resources for the solution, or only those resources that you want to manage as a group. You decide how you want to allocate resources to resource groups based on what makes the most sense for your organization. [Learn more](#)

Create Logic App (Multi-tenant) ...

Create a logic app, which lets you group workflows as a logical unit for easier management, deployment and sharing of resources. Workflows let you connect your business-critical apps and services with Azure Logic Apps, automating your workflows without writing a single line of code.

Project Details

Select a subscription to manage deployed resources and costs. Use resource groups like folders to organize and manage all your resources.

Subscription * Azure for Students

Resource Group * rg2

ENG IN 33% 15:52 16-04-2026

Microsoft Azure portal interface showing the Logic app designer. The main canvas displays a workflow starting with "When an HTTP request is received" followed by "Send email (V2)". The right-hand pane shows the configuration for the "Send email (V2)" action, including the "To" field (jasleencuni@gmail.com) and the "Subject" field (BLOB Subject). The "Body" field is set to "BLOB Body". The left-hand pane shows the "Logic app designer" section with various tools and settings.

Microsoft Azure portal interface showing the "Run with payload" configuration for the Logic app. The main canvas displays the "Run with payload" configuration, including the "Input" section (URL, Method, Headers) and the "Body" section (JSON payload). The "Body" section shows a JSON payload:

```
{  "fileName": "gtcvu.txt"}
```

. The left-hand pane shows the "Overview" section with various tools and settings.
