Create an Azure Cosmos DB account

Which API best suits your workload?

Azure Cosmos DB is a fully managed NoSQL and relational database service for building scalable, high performance applications. [Learn more](#)

To start, select an API to create a new account. The API selection cannot be changed after account creation. To use multiple APIs, you can create separate accounts with different APIs as needed.

Recommended APIs

Other APIs

Azure Cosmos DB for NoSQL

Azure Cosmos DB's core, or native API for working with documents. Supports fast, flexible development with familiar SQL query language and client libraries for .NET, JavaScript, Python, and Java.

Create

Learn more

Azure DocumentDB (with MongoDB compatibility)

Fully managed document database service with full MongoDB compatibility. Migrate your existing MongoDB databases to DocumentDB and achieve >40% savings. Create new apps that need complex queries or faster AI search.

Choose Architecture

Which type of resource?

Azure DocumentDB (with MongoDB Compatibility) is designed for modern workloads, AI/Vector search, and cost efficiency. Cosmos DB for MongoDB supports request unit (RU) accounts for specialized use cases. Not sure which to choose? [See why most users pick Azure DocumentDB.](#)

Note: Once a resource is created, your choice cannot be changed.

Recommended: Azure DocumentDB

- Vector search + GenAI support
- Cost-efficient scaling model
- Open-source engine [learn more](#)
- Designed for multi-cloud and hybrid cloud solutions
- [See documentation and supported features](#)

Create

Request unit (RU) database account

- Designed for point-reads and simple queries
- Instant, granular autoscaling
- Multi-region writes
- Limited for analytics and AI workloads
- [See documentation and supported features](#)

Configure availability zone settings for your account. You cannot change these settings once the account is created.

Availability Zones ☐ Enable ☒ Disable

Location * (US) West US 2

Capacity mode ☐ Provisioned throughput
Request units per second (RU/s) are pre-configured and billed hourly, offering guaranteed throughput with two modes— **Autoscale**, which dynamically adjusts within a 1-10x range for varying workloads, and **Manual**, with fixed RU/s for steady, predictable traffic.
☒ Serverless
Ideal for intermittent or unpredictable traffic. Billed only for consumed RU/s, scaling on-demand without capacity planning or minimum charges.
